claim 23        line 1    Change "A mesh generation system" to --A computer-implemented mesh generation system--.

***Reasons for Allowance***

4. The following is an Examiner's Statement of Reasons for the indication of allowable subject matter. The instant application is directed to a non-obvious improvement over the inventions described in the related prior art, the improvement comprising a mesh generation system for generating a mesh used for finite element analysis, wherein a characteristic is

extracted from a conventional mesh and is changed, whereby a mesh is generated for a target shape model in accordance with the extracted characteristic, or the characteristic as changed. This patentable distinction is included in independent claims nos. 23-26. The art of record, either individually or in combination, fails to teach, suggest, or render obvious the useful, concrete and tangible <automation of the process for modifying a mesh once it has been generated> having the corresponding structure which is disclosed in the specification and equivalents thereof at least at page 11, line 1 through page 33, line 27, and Figures 1-22. In view of the foregoing, the claims of the present application are found to be patentable over the prior art.
